This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR.

NPCR 009:2018 Part B for Technical - Chemical products in the building and construction industry

Organisation no:

556241-2592

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Issue date: 07.03.2022

Valid to: 07.03.2027

Declared unit:

1 kg Dalapro Hydro

Year of study:

2020

Declared unit with option:

A1,A2,A3,A4

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Functional unit:

Development and verification of EPD:

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

Developer of EPD:

Ellinor Johansson

Reviewer of company-specific input data and EPD:

Christian Borgenfalk

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the proccess is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Product

Product description:

Dalapro Hydro is a ready-mixed hand filler for use in wet rooms or where an extra durable surface is desired. A high binder content in the filler gives the product a hard, water repellent surface, and maximum adhesion to the substrate. The product is suitable for joint filling and thin smoothing. Suitable for most substrates in new construction and renovation.
Blue color.
Nordic Ecolabelled.

Product specification

Packaging:
Dalapro Hydro: 10 litre bucket, 3 litre bucket and 400 ml tube.
10 litre and 3 litre bucket is packaged in a bucket manufactured in 100 % recyclable plastic and consists of at least 90 % recycled plastic.
All calculations in this EPD is made with the recycled 10 litre bucket. It represent the majority of the market.

LCA: Calculation rules

Declared unit:

1 kg Dalapro Hydro

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

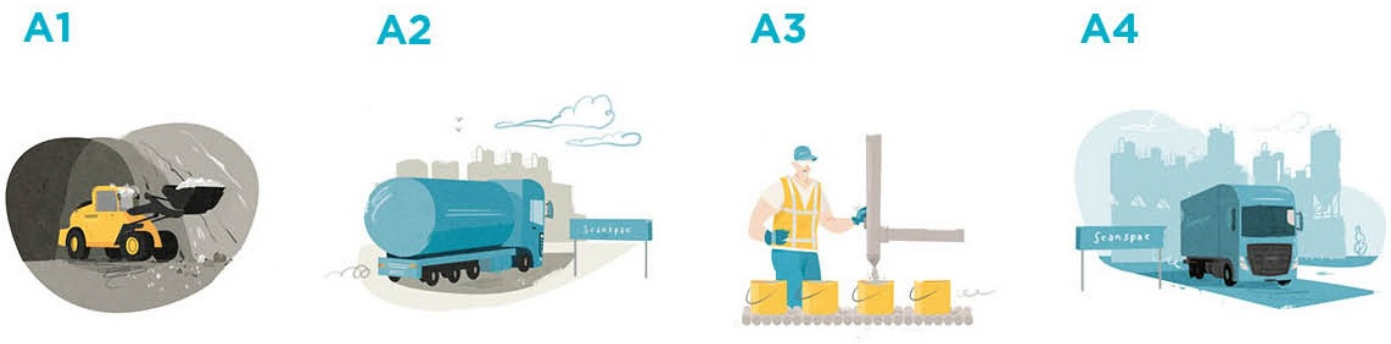
System boundary:

The flowchart shows the system boundaries A1-A4.
All calculations in this EPD is made with the recycled 10 litre bucket. It represent the majority of the market.



Additional technical information:

Suitable for embedding paper tape. Combined with Certain-Teed Marco Joint Tape, the product is suitable for joint filling on plasterboard. Meets CE-marking requirements in accordance with EN 13963. Manufactured in accordance with ISO 9001 and ISO 14001. When finishing plasterboard: follow recommendations in accordance with EN 13963 or National guidlines for finishing plasterboards.
